Pillow preference is often determined by personal taste. VitalFoam Custom Memory Contour pillows and TempurPedic® pillows (~5.3 density rating) are a bit firmer and made of a slightly denser viscoelastic foam material than other viscoelastic pillows. Our VitalFoam Memory Lite and Memory Lite Deluxe Pillows (~4.3 density rating) are a bit softer for those who prefer a gentler pillow at a significantly lower price. Memory Lite pillows are recommended for those looking for a softer contour pillow and find the TempurPedic and VitalFoam Custom Memory Contour pillows to be too firm.
